# Education transformation in the 21<sup>st</sup> century

Technology is reimagining the way we live, work, and experience the world around us. As the pace of digital transformation accelerates, the students of today will grow up to have to navigate a future that looks vastly different from now.

To be able to effectively prepare students for the increasingly digital world, education itself needs to undergo a transformation. This comes with a unique set of challenges.

## Human challenges

- Value-based learning metrics
- Digital upskilling
- Student journey blockchains
- Digital wellness

## Technological challenges

- Digital ID and trust
- Digital proctoring
- Cybersecurity

## Operational challenges

- Pandemic-safe campus operations
- Automated admin & operations
- Outcomes-based procurement

 **Windows 11**

Designed for Education

## EDVISION PROGRAM

Inspiring smarter learning  
beyond the classroom

**Personalized teaching**

**Engaged learning**

**Parent-educator collaboration**

# Modernize teaching and learning for the new normal

Moving forward, the hybrid trend in education is set to continue in the new normal. Beyond just shifting lessons online, there needs to be a fundamental shift in the education sector to help students reap the full benefits of hybrid learning.

**“Students who receive personalized instruction perform better than 98% of traditionally taught students”**

Technology will continue to play a key role in enabling personalized teaching and engaged learning to transform the classroom experience for each and every student. But adopting new technologies alone is not enough. The teacher’s cultivation of the technology in the classroom, as well as the parent’s collaboration with the teachers and the community, are the catalyst to a successful education transformation.

At Lenovo, we believe a comprehensive digital transformation for education is critical for society’s development. With Lenovo Edvision, we want to empower the new generation of educators and students with the next-level education solutions that inspire learning beyond the physical classroom. Through our close collaboration with experts in education and our own technology industry peers, we aspire to continue being a leader in best-in-class learning solutions for the smart classrooms of the future.

# End-to-end education solutions for immersive learning

The shift to hybrid learning is a multifaceted process. The education sector will need innovative technologies that help teachers accomplish more with less, as well as place students at the centre of their own learning.

With EdVision, Lenovo and Microsoft bring smarter technology, bundled with services, to the education sector to help it address the challenges ahead.

- Solutions deployable at scale to ensure digital equity
- Personalized learning to address unique needs of each individual child
- Prepare students for a digital future

Designed to be immersive, easy-to-use, flexible, and collaborative, EdVision's end-to-end education solutions aim to help educators unlock the full potential of learning in the classroom and beyond.

# Step into a new era of digital learning with Windows 11 SE

The strategic partnership between Lenovo and Microsoft will empower teachers and transform the way they teach, while still managing cost, efficiency and security. Windows 11 SE, a new cloud-first Windows edition, offers the performance and reliability of Windows 11 with simplified design and modern management tools that are optimized for low-cost devices in educational settings.

Featuring an easy-to-use interface plus an education-first menu of curated apps, Windows 11 SE comes with affordable devices that are pre-configured for student privacy and remote management. Schools can access a wide range of affordable, personalized devices that are built for inclusive, accessible learning, while schools conserve critical technology resources. And, with a cleaner interface and fewer distractions, Windows 11 SE helps students focus on learning while preserving valuable class time for instruction.

With Lenovo's range of smarter education devices powered by Windows 11 SE, students will have at their fingertips powerful tools to learn, collaborate, and create in a secure and trusted environment.

Helping educators  
transform the way they  
teach using smarter  
innovative solutions

By 2022, up to **40%** of educators will undergo training to develop digital skills that foster better student engagement, knowledge acquisition and learning retention
